

APPROVED FIRE PIT'S FOR CAMPFIRES

Outdoor Fireplace: A device made of rock-brick, metal, concrete, or any other noncombustible material and shall not be more than 3 feet in diameter and 2 feet high.

Portable Fireplace & Pit's: A portable, outdoor, solid-fuel-burning fireplace: constructed of steel, concrete, clay, or other noncombustible material. A portable outdoor fireplace may be open in design or may be equipped with a small hearth opening and a short chimney or chimney opening in the top.

Campfire Area: An outdoor fire burning area for recreational fires where natural wood material other than rubbish can be burned. The campfire area must have all combustible material removed down to mineral soil and shall have a containment area of either rock-brick, metal, concrete, or any other noncombustible material and shall not be more than 3 feet in diameter and 2 feet high. All combustible material 1 ½ feet surrounding the campfire area shall be removed. Fuel for the recreational residential campfire shall not extend above the edge of the campfire containment area. Use only dry seasoned firewood.
